## **MP-LINE Data Sheet**

MP-LINE metal plates are made from various alloys, the most common being:

- stainless steel 316L,
- stainless steel 304,
- aluminium ENAW1050.

The surface of the base is brushed for a matt finish and better anti-slip effect.  
The brushing severity is either K240 or K320.

The tactile elements on top of the plates are made from the same metal alloys or from a thermoplastic polyurethane Desmopan 3055DU. The tactile elements are attached on the plates using a liquid self-adhesive tape 3M VHB 5925 (Very High Bond).

## **MP / PH1**

Tactile floor guiding plate.

Smooth surface, matt brushed finish.

Base dimensions = 300 x 300 x 2 mm

Strip dimensions = 25 x 140 x 3.5 mm

The strips form a guiding line of four strips across and two strips longitudinally.

## MP / PD1

Tactile floor guiding plate.

Smooth surface of the base, diamond surface of the tactile strips.

Base dimensions = 300 x 300 x 2 mm

Strip dimensions = 25 x 140 x 3.5 mm

The strips form a guiding line of four strips across and two strips longitudinally.

## MP / PH2, PD2, P2

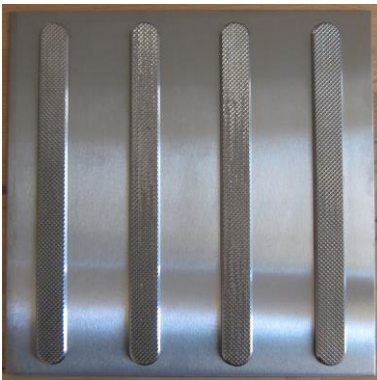

Tactile floor guiding plate.

Smooth surface of the base, brushed finish.

Base dimensions = 300 x 300 x 2 mm

Strip dimensions = 25 x **280** x 3.5 mm

The strips form a guiding line of four strips across and **one** strip longitudinally.

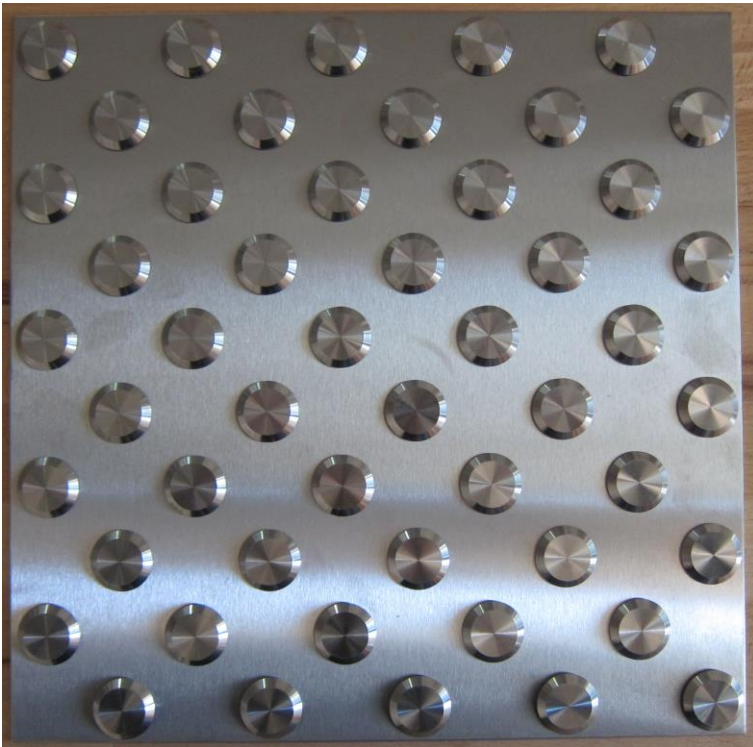

## MP / KH

Tactile floor warning plate.

Smooth surface of the base and the tactile studs.

Base dimensions = 300 x 300 x 2 mm

Studs dimensions = 25 x 3.5 mm

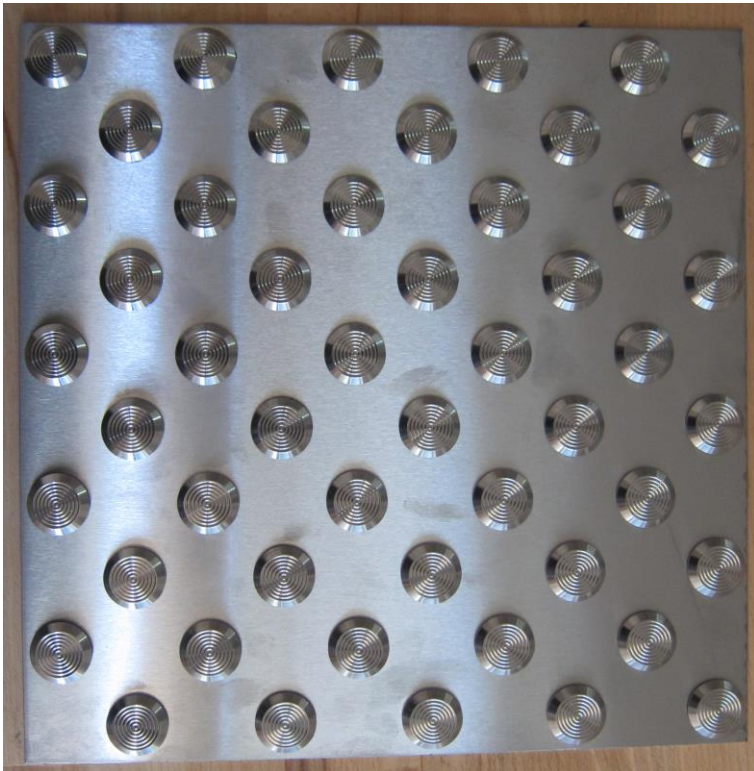

## MP / KH

Tactile floor warning plate.

Smooth surface of the base, riffled surface of the tactile studs.

Base dimensions = 300 x 300 x 2 mm

Studs dimensions = 25 x 3.5 mm

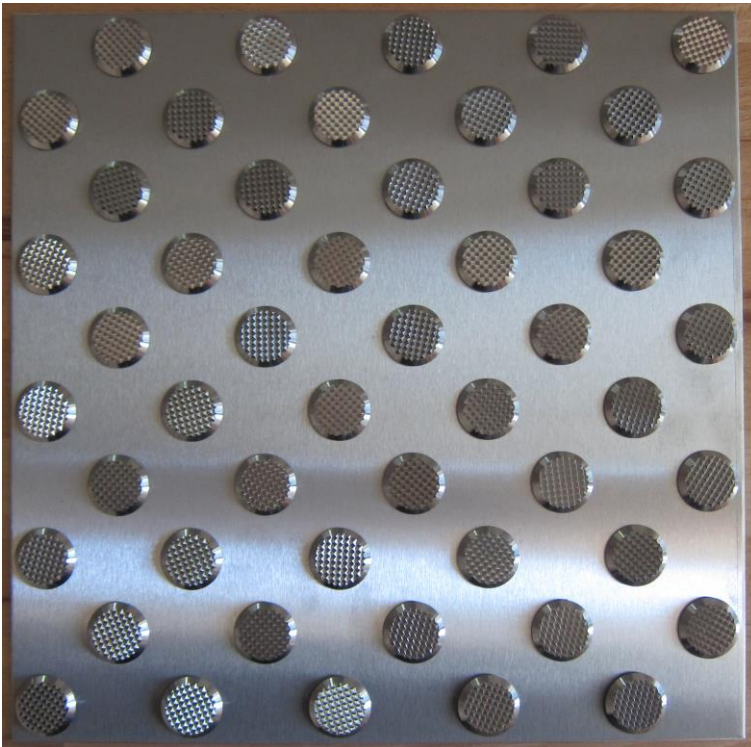

## MP / KD

Tactile floor warning plate.

Smooth surface of the base, diamond surface of the tactile studs.

Base dimensions = 300 x 300 x 2 mm

Studs dimensions = 25 x 3.5 mm

## MP / K-TPU

Tactile floor warning plate.

Smooth surface of the base, rough sandblasted surface of the polyurethane studs.

Base dimensions = 300 x 300 x 2 mm

Studs dimensions = 25 x 3.3 mm
